github.com/Seelamneni-lavanya

Career Objective

Engineering student working with Python and AI/ML, with a strong interest in designing and scaling real-world systems. Interested in intelligent applications and motivated to contribute meaningfully while continuously learning and evolving as a developer.

Education

Malla Reddy Engineering College For Women, Hyderabad 2023 – 2027
B.Tech in Computer Science Engineering CGPA: 8.55

Sri Nalanda Junior College, Kothagudem 2023
MPC Percentage: 93.8%

Technical Skills

- **Languages:** Python, SQL, Java(basic)
- **Data Visualization Tools:** Power BI , Microsoft Excel
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn
- **Databases:** MySQL
- **Tools:** Git, VS Code, Google Collab

Projects

Orbital Shield : AI-Driven Space Debris Collision Risk Prediction and Avoidance System

- Developed an AI-based system to predict potential collisions between satellites and space debris using Machine Learning techniques.
- Analyzed orbital data to assess collision risks, generate real-time alerts, and recommend avoidance manoeuvres.
- Utilized Python, Scikit-learn, TensorFlow, Pandas, and NumPy for data processing and predictive modelling.
- Designed a solution to improve satellite safety, reduce mission failure risks, and support sustainable space operations.

Alzheimer's Disease Prediction Using Deep Learning

- Developed a Deep Learning-based system for early prediction of Alzheimer's disease using MRI brain images.
- Implemented a Convolutional Neural Network (CNN) model to classify and detect Alzheimer's stages with high accuracy.
- Built a user-friendly Streamlit application for automated diagnosis and faster prediction results.
- Utilized Python, TensorFlow, Keras, OpenCV, and NumPy for image processing, model training, and prediction.

Experience

Virtual Experience

- Apex Data Analytics
- Python Programming Certified in Vaultof Codes

Certifications

Cisco Python Essential 1 & 2 June 2026
Deloitte Data Analytics Job Simulation July 2025
